

This list contains all the error numbers and error descriptions for Microsoft Access 2010, 2007, and 2003.

We hope you find this list useful for reviewing errors that may appear in your application.

To minimize the space, duplicate descriptions are eliminated, so if all three Access versions have the same error description for an error ID, only the 2010 version is shown. Similarly, if the Access 2003 version is the same as 2007, it's not shown, but if the 2003 version differs, it is shown.

To reduce space, undefined error descriptions which provide no meaning ("Application-defined or object-defined error") are excluded from this list.
